itc · AUDIO PERIPHERALS

T-521CF

Charger

The itc T-521CF is a charger from itc's Audio Peripherals range, built for system integration — processing, feedback control, connectivity and wireless microphone distribution.

Key figures: input power DC 12V / 1A; battery AA Ni-MH rechargeable battery; charging method Constant voltage PWM mode and trickle charging mode. Highlights include constant voltage PWM and trickle charging mode, automatically identify the faulty battery with irregular flash, charging status on LCD display and two charging sockets.

Key features

- Constant voltage PWM and trickle charging mode
- Automatically identify the faulty battery with irregular flash
- Charging status on LCD display — Standby status: empty battery display Charging status: battery grid flash and increase Full-charged status: display 6 without flashing
- Two charging sockets — Can be used at the same time For charging handheld MICsor wearable transmitters

Technical specifications

Battery	AA Ni-MH rechargeable battery
Input power	DC 12V / 1A
Charging method	Constant voltage PWM mode and trickle charging mode
Charging current	About 500mA
Size	98 × 70 × 165mm(W×H×D)
Weight	0.36Kg (excluding external switched power supply)
