itc · AUDIO PERIPHERALS

TS-18C

Desktop Socket

The itc TS-18C is a desktop Socket from itc's Audio Peripherals range, built for system integration — processing, feedback control, connectivity and wireless microphone distribution.

Key figures: power supply AC 220V 50-60/HZ; pop-up method Air-supported pole; elevation angle 45 degrees, fully accord with engineering principles. Highlights include all-aluminum structure with CNC engraving craft, hidden design makes the surface neat and beautiful, anodic oxidation treatment with high quality and adopt standard modules for strong signal.

Key features

- All-aluminum structure with CNC engraving craft
- Hidden design makes the surface neat and beautiful
- Anodic oxidation treatment with high quality
- Adopt standard modules for strong signal
- Work with central control matrix to realize video switching

Technical specifications

Power supply	AC 220V 50-60/HZ
Pop-up method	Air-supported pole
Elevation angle	45 degrees, fully accord with engineering principles
Overall weight	2.0Kg
Product size	175×130×145mmm
Box size	166×122×140mm
Desktop opening size	166×122mm(through hole, recommended to open hole according to the actual product)
Environment conditions	-20℃□50℃ humidity ≤70%, no condensation
Configuration port	One multi-function power supply, two network, one 3.5 audio, one HDMI, one video switching
